

# Community Kraal

Stories from the grassroots to challenge and inspire!

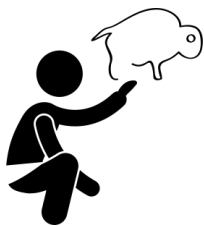

## What is the community kraal?

A space where to pose a challenge or share a story of inspiration – linking grassroots' experience to the adaptation community of practice.

### Sharing your challenge or story of inspiration...

If you would like to make a contribution (max 7 minutes presentation) and are happy that this is filmed in the process to be shared on the Adaptation Futures website – please contact Bettina Koelle ([Koelle@climatecentre.org](mailto:Koelle@climatecentre.org)) with Community Kraal in the subject line.

### Creating a joint art work

We are inviting all conference delegates, speakers and dignitaries to contribute their creativity and thoughts to a joint Adaptation Futures 2018 artwork.

Please join South African artist Noah Rudolph in creating a collective message for the next Adaptation Futures conference. You will find this artwork in progress at the community kraal.

## Where do you find the community kraal?

You will find the community kraal at the CTICC on Landing A, on the first floor.

## Programme

### Tuesday, 19 June 2018
